

Gaby's story

Join a Movement to Work programme and discover what you could become.

Movement to Work

My Skills

As a Fabricator Plater I use these skills every day:

- Teamwork and working with others;
- Talking and listening to people;
- Problem solving and finding solutions;
- Organisation and planning;
- Attention to detail and quality control;
- Time management and working to deadlines;
- Getting jobs done on time.

My Life

- I was studying Health and Social Care at college until I had my son.
- I went to university but had to move to a women's refuge and stopped my course.
- I decided to join the Movement to Work programme because I was curious about engineering but had limited knowledge.
- I hadn't even used a drill before I started with BAE Systems!

And now

- I am a fourth year Fabricator Plater apprentice.
- I have a stable career with good benefits and pension.
- I'm learning transferrable skills.
