

# Nikita's story

Join a Movement to Work programme and discover what you could become.

Movement to Work

## My Skills

As an electrical technician, I use these skills every day:

- Working to guidelines, policies and being compliant;
- Working to a deadline and time management;
- Attention to detail and a high quality of work;
- Being organised;
- Time keeping and being punctual;
- Teamwork and working with others;
- Problem solving and finding solutions;
- Talking and listening to people.

## My Life

- I left school with BTECs and no GCSEs and decided to go back into education and study Motor Vehicle Level 1 and 2.
- I had a cleaning job in the mornings before I went to college.
- I moved and found it very difficult to find work.
- I found myself living in supported accommodation due to circumstances out of my control, but it gave me the motivation to press on and find a secure career.
- My support worker posted a leaflet through my door for the Movement to Work scheme. I secured a place on the taster day and got a place on the scheme.
- At the end of the scheme I was offered a job here and it was the proudest day of my life so far.

And now.....

- I'm very pleased to say I've recently moved out of supported accommodation.
- I am now living in my own flat and working in the job of my dreams. I couldn't be happier.
