

# Hafsah's Internship Success Story

Hafsah was a part of the 2017-18 cohort of Supported Interns at the Oxford Road Campus. The internship programme is delivered as a partnership between MFT, Pure Innovations and The Manchester College. Hafsah was a part of a group of 9 interns who undertook a placements in a variety of departments and roles over the academic year to gain key insight and new skills.

Hafsah had already gained some work experience on previous programmes when she got involved in the internship but her the placements she undertook really enabled her to take her career to the next level. Hafsah worked in a variety of departments but the one that she liked the most was in the dental hospital.

Hafsah has an eye for detail which has helped enabled her to become a key part of the administration team at the dental hospital. She has found the team around her very supportive and has gained confidence and communications skills. Hafsah is now much more comfortable talking to patients as well as her colleagues and she always looks forward to coming to work.

## What's next for Hafsah?

Hafsah successfully gained employment at MFT working in the dental hospital where she now works full time working in and administrative role. She is excited about her future career in healthcare, recently bought a cool new watch and is also saving to buy a new house.

## Jodie Booth - Curriculum Manager - The Manchester College

"The transformation that we have seen in Hafsah since her year on the Supported Internship has been incredible. The opportunities that Hafsah had on her placements really supported her to develop her work skills, confidence and self-esteem. Hafsah is a fantastic role model to other young people. She is clearly a valued member of the team and I am sure will continue to develop her skills and be an asset to MFT."
